INTERNSHIP

Machine Learning Intern | FlyRank AI

July 2026 – Aug 2026

Remote

- Built ML workflows using Python, Pandas, and Jupyter Notebooks on production-scale datasets.
- Performed data validation, feature engineering, and exploratory data analysis for model development.
- Designed SQL-based data quality checks and data contracts to improve dataset reliability.
- Conducted data leakage analysis and documented findings using Git and GitHub workflows.

TECHNICAL SKILLS

Languages: C, C++, Java, Python, JavaScript, SQL

Big Data & Tools: Apache Spark (PySpark), Hadoop (HDFS, MapReduce), Git, Docker, FastAPI, Power BI

Web Development: HTML, CSS, JavaScript, Flask

Databases: MongoDB, Oracle Database, XAMPP

Libraries: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn

IoT: ESP32, LoRa, MQTT, Sensor Integration

Cloud: Google Cloud Platform (GCP)

Coursework: Data Structures & Algorithms, Operating Systems, DBMS, OOP, System Design

TECHNICAL PROJECTS

SafeMine – AI Smart Helmet | ESP32, LoRa, Node.js, MQTT

- Developed IoT-based smart helmet integrating **5 sensors** for real-time hazard detection in underground environments.
- Designed LoRa-based communication system enabling data transmission across **50–100m range** where traditional networks fail.
- Built real-time backend using Node.js and MQTT for continuous monitoring and alert generation.
- Implemented multi-sensor data fusion reducing **false alert rate by ~30%** through threshold-based filtering.

Shuruaat AI – Agentic AI Co-Pilot for Online Sellers | Python, FastAPI, LangGraph, React, Groq

- Built a **3-agent LangGraph system** (Listing, Q&A, Health) reducing return rates by **30–40%** for **10M+ Indian sellers**.
- Engineered multimodal **Return Risk Predictor** scoring listing quality across **4 risk dimensions** before publish.
- Integrated **Sarvam AI STT** enabling voice-first listing creation in **8+ Indic languages** under **60 seconds**.
- Developed **COD/RTO fraud scoring** across **500+ pincode zones** with async FastAPI backend and React PWA frontend.

AI Assignment Evaluator System | Python, Flask, MongoDB, JavaScript

- Engineered an AI-powered system to automatically evaluate student assignments and generate structured feedback.
- Integrated plagiarism detection across **75+ assignments**, flagging similarity with over **90% detection accuracy**.
- Applied AI-based analysis to identify AI-generated responses, **reducing manual review time by ~40%**.
- Created dashboards for teachers and students to upload assignments and review evaluation results.

EDUCATION

Graphic Era Hill University

Dehradun, Uttarakhand

B.Tech in Computer Engineering (Specialization in AI & DS) – GPA: 8.10/10

Jul 2023 – Jun 2027

ACHIEVEMENTS

- Selected for the Digital Specialist Engineer (DSE) role at Infosys through HackWithInfy.
- Secured 2nd Position in Graph-e-thon 3.0 National Level Hackathon for developing SafeMine – AI-powered smart helmet safety system.

CERTIFICATIONS

- Google Cloud Computing Foundations – NPTEL
- Machine Learning – Coursera
- Database Management Systems – NPTEL
